Tips for Channel 95

- Create your slide in Landscape format, the same as your TV. Portrait format is fine for bulletin boards.
- Photographs of your slide are not as effective as the original file.
- Be economical with the number of words. Fewer words results in larger font size.
- Do not crowd the slide with photos or clipart. This results in smaller font again.
- Send your completed masterpieces to the email address shown on the first slide on Channel 95. Paper copies require more work by the slide presenter.
